*Bachelor of Science in Computer Science*

Expected Graduation Date: May 2023

## WORK EXPERIENCE

---

### Computer Science Tutoring

Jan 2021 – Sep 2021

- Gave online instruction to computer science students ranging from high school to sophomore university students.
- Tutored in both a large group and also one on one sessions through discord

### Fish Market, Chicago, IL

June 2018 – present

*Customer Service Associate*

- Worked as a team member to provide highest level of service to customers
- Keep the store stocked and well maintained
- Received and processed cash and credit card payments
- Greet and serve customers

## PROJECTS

---

### Business Statistics Dashboard

*VSCode, React*

- Displays Analytics of a businesses' earnings, revenue, and sales to enable them to improve upon their sales
- Provides a section to the user to display employees and each personal employee payroll on a weekly basis
- Worked with two different businesses owners to understand what analytics they wanted and what I could provide with the data given to me for their personal websites

### Park Smart

*VSCode, HTML, Express.js*

- As part of a small team, developed several web applications focusing on notifying a user of what parking spots are available nearest to them
- Developed web applications from front to back-end using JavaScript, HTML, and Express
- Implemented enhancements that improved web functionality and responsiveness

### CTA Data Analysis

*Visual Studio Python, MySQL*

- Allowed a user to retrieve analytical information on the CTA including up to Station names, number of riders per a station etc.
- To allow visual representation of the data, python is used to portray a map of the CTA and statistics
