WORK EXPERIENCE

Fish Market, Chicago, IL

June 2018 – present

Customer Service Associate

- Worked as a team member to provide highest level of service to customers
- Keep the store stocked and well maintained
- Received and processed cash and credit card payments
- Greet and serve customers

Computer Science Tutoring

Jan 2021 – Sep 2021

- Gave online instruction to computer science students ranging from high school to sophomore university students.
- Tutored in both a large group and one on one sessions through discord

PROJECTS

Smart Grocery

Jan 2023 – Present

VSCode, React Native Expo

- Developed "Smart Grocery" app for both IOS and Android, offering personalized recipe recommendations based on user-provided ingredients via barcode scanning or manual input
- Integrated geolocation services to display nearby grocery stores and highlight the most cost-effective options for ingredient sourcing
- Leveraged Firebase for backend infrastructure, ensuring a robust, scalable, and efficient platform for seamless user experience

Park Smart

Aug 2022 – Dec 2022

VSCode, HTML, Express.js

- As part of a small team, developed several web applications focusing on notifying a user of what parking spots are available nearest to them
- Developed web applications from front to back-end using JavaScript, HTML, and Express
- Implemented enhancements that improved web functionality and responsiveness

CTA Data Analysis

January 2022

Visual Studio Python, MySQL

- Allowed a user to retrieve analytical information on the CTA including station names, number of riders per a station, weekday ridership and weekend ridership
- To allow visual representation of the data, python is used to portray a map of the CTA and statistics

KEY SKILLS

- Technical skills: C/C++, Java, Python, Excel, React, SQL, JavaScript, HTML
- Software: VSCode, Visual Studio, Eclipse, Microsoft Office, GIT
- Operating Systems: Windows, Linux
- Fluent in Arabic
